

Training Event	Summary	Time	Location	Participants	Personnel Spt	Equipment/Supplies
M9 Pistol Range	Combat Pistol Qualification Course	0800-1200	Range D	16 firers	2LT High, SFC Craft, RTO, Safeties (4), Ammo Detail (2): TOTAL - 9	M9 Pistols, Magazines, Ammo
Land Navigation Course	Opportunity Training	0800-1600	TA 104N	Soldiers scheduled for NCOES and select personnel	CDT Rourke, 2 Assistants: TOTAL - 3	Compasses, Protractors
**STX's	2 hour rotation per lane, including in-brief, rockdrill, rehearsal, execution, and AAR		Tng Areas throughout MTC	3 Task Organized Convoy's from all 3 units - about 10-15 vehicles in each	CPT K, SFC Mashaw: TOTAL - 2	Convoy vehicles, 7 HMMWV's, 1 truck, blank ammo/pyro, handheld radios
STX Lane 1	Convoy to ROM Site - React to Improvised Explosive Device	0800-1800	TA 102S, 102E, 103 W, 103 E	Rotating Convoy Element	1LT Stallworth, Asst O/Cs (2-E5/E6's), Medical O/Cs (2), OPFOR (4): TOTAL - 9	1 HMMWV, 1 OPFOR vehicle, ammo, pyro
STX Lane 2	Convoy to FLE Site - React to Direct Fire Ambush	0800-1800	TA 105W, 104W, 104N	Rotating Convoy Element	1LT Louck, Asst O/Cs (2-E5/E6's), Medical O/Cs (2), OPFOR (6): TOTAL - 11	1 HMMWV, 2 OPFOR vehicles, ammo, pyro
STX Lane 3	Rappel Tower, Hand Grenade Practice Course	0800-1800	Rappel Tower, Range G	Rotating Convoy Element	1LT Heck, 2 Rappelmasters and 6 assistants: TOTAL - 9	Ropes, Snaplinks, Swiss Seats, Gloves, Kevlars, 2 radios, Hand Grenade Bodies
					TOTAL SPT PAX: 43	
POW/SERE STX	Train soldiers on techniques to employ when facing capture	1930-2300	Armory/POW Compound	ALL	CPT Mooney, SFC Kuzel, E7's and above	Weapons, Ammo, OPFOR uniforms, Zipties, Blindfolds

Training Event	Tasks to train	Components of tasks to train	Time	References	91W Training Integration
STX Lane 1: Convoy to ROM Site - React to Improvised Explosive Device	1. Identify IED's and terrorist/sniper TTP's.	What is an IED? What other weapons are being employed? What do they consist of? Why are they being employed? How are they being employed?	10 min	OIF Smartcard, Co Cdr Lessons Learned Letter	
Intent: Train soldiers how to individually and collectively react to an IED while in a convoy.	2. Review countermeasures and TTP's for preventing IED or terrorist/sniper attack.	How do you spot an IED/terrorist threat or a likely place to employ one? What general convoy/stationary procedures will prevent exposure? What considerations should be made when planning convoy/stationary operations? What do you do once you've identified a likely IED/terrorist threat?	10 min	BN TACSOP, CALL Handbook 3-33	
	3. Review battle drills and TTP's for reacting to attack by IED or terrorist/sniper.	What happens if we are attacked? What if we identify responsible attackers? What do we do if there are casualties (friendly, enemy, civilian)? What do we do if there are damaged vehicles? What do security vehicles do? What do medical personnel do? What are reporting procedures?	20 min	BN TACSOP, CALL Handbook 3-33	
	4. Rehearse (crawl through) convoy movement, IED scenarios, occupying stationary site and enemy contact scenarios.	(Have leaders) Crawl through planning, rehearsals, and PCI's. Planning should include site layout, identification of leaders, communication plans, COA planning, etc. Rehearsals should include a convoy and ROM simulation with execution of mounted and dismounted battle drills, casualty evacuation, vehicle recovery and communications. PCI's should include comms checks, vehicle PMCS, weapons testing, maintenance vehicle checks, etc.	45 min	BN TACSOP, CALL Handbook 3-33	
	5. Execute (in vehicles) convoy movement/site occupation and react to IED/enemy contact scenarios.	Blank Fire iteration with moving vehicles. Retrain until at least one iteration has been done where IED is identified and avoided, one iteration where convoy is attacked, and one iteration with a secondary attack. Casualty evacuation will be conducted/evaluated to achieve 91W training objectives.	75 min	BN TACSOP, CALL Handbook 3-33	Truama Casualties/Evacuation based on the Lane Scenario: 1) Amputation of Limb 2) Airway Management of Unconscious Casualty 3) Blunt Injury to the Head & Chest 4) Shock Victim
	6. AAR		20 min	TC 25-20	
TOTAL TIME ON LANE			180 min	3 hours	

Training Event	Tasks to train	Components of tasks to train	Time	References	91W Training Integration
STX Lane 2: Convoy to FLE Site - React to Direct Fire Ambush	1. Identify enemy ambush and terrorist/sniper TTP's.	What weapons are being employed? Why are they being employed? How are they being employed?	10 min	OIF Smartcard, Co Cdr Lessons Learned Letter	
Intent: Train soldier on how to react to contact while in a convoy.	2. Review countermeasures and TTP's for preventing attack while stationary and in convoy.	How do you spot a likely convoy ambush or terrorist/sniper situation? What general convoy/stationary procedures will prevent exposure? What considerations should be made when planning convoy/stationary operations? What do you do once you've identified a likely convoy ambush/attack situation?	10 min	BN TACSOP, CALL Handbook 3-33	
	3. Review battle drills and TTP's for reacting to attack while in convoy or stationary.	What happens if we are attacked? What if we identify responsible attackers? What do we do if there are casualties (friendly, enemy, civilian)? What do we do if there are damaged vehicles? What do security vehicles do? What do medical personnel do? What are reporting procedures?	20 min	BN TACSOP, CALL Handbook 3-33	
	4. Rehearse (crawl through) convoy movement, occupying stationary site and enemy contact scenarios.	(Have leaders) Crawl through planning, rehearsals, and PCI's. Planning should include order of march, identification of leaders, communication plans, COA planning, etc. Rehearsals should include a dismounted convoy simulation with execution of battle drills and communications. PCI's should include comms checks, vehicle PMCS, weapons testing, maintenance vehicle checks, etc.	45 min	BN TACSOP, CALL Handbook 3-33	
	5. Execute (in vehicles) convoy movement/site occupation and react to contact scenarios.	Blank Fire iteration with moving vehicles. Retrain until at least one iteration has been done where enemy is identified and avoided, one iteration where convoy is attacked, and one iteration with a secondary attack. Casualty evacuation will be conducted/evaluated to achieve 91W training objectives.	75 min	BN TACSOP, CALL Handbook 3-33	<p>Truama/Medical Casualties/Evacuation: Injuries based on Lane</p> <p>1) Sucking Chest Wound</p> <p>2) Limb Fracture</p> <p>3) Bleeding Control</p> <p>4) Back Injury/Immobilization</p>
	AAR		20 min	TC 25-20	
TOTAL TIME ON LANE			180 min	3 hours	

Training Event	Tasks to train	Components of tasks to train	Time	References	91W Training Integration
STX Lane 3: Rappel Tower, Hand Grenade Practice Course	1. Review swiss seat assembly and tie swiss seat.	Instructor reviews purpose of swiss seat and demonstrates tying. Then walks group (with buddies inspecting) through assembly.	15 min		
Intent: Train soldiers on how to rappel and how to employ hand grenades. Rotate through sub-stations if possible.	2. Review rappelling techniques on small decline wall.	Explain why we rappel and the techniques for doing so properly. Demonstrate techniques. Have soldiers practice rappelling techniques on small decline wall until proficient.	20 min		
	3. Rappel off tower.	Have each soldier rappel off tower at least twice.	30 min		
	4. Identify types of hand grenades, uses, and employment.	Review different types of grenades, how to identify them, when and why they would be used, how to properly employ them.	10 min	FM 3.23-30	
	5. Practice dummy hand grenade throw.	Have each soldier practice throwing several empty dummy grenades from the kneeling position at a 30 meter target area.	10 min	FM 3.23-30	
	6. Conduct Hand Grenade Qualification Course.	Have each soldier complete the HGQC with hand grenades bodies with fuse. Grade each soldier and complete qualification scorecard.	25 min	FM 3.23-30	Cardiac Management
	AAR			20 min	TC 25-20
TOTAL TIME ON LANE			120 min	2 hours
